

Union Pacific: Unsafe for workers.

Hundreds of Union Pacific employees have contracted Covid-19 at work. Two (2) of our BMWED Union Brothers have died. Dozens have been hospitalized, and some will never be the same.

Our Union leadership has urged U.P. Management to do more to ensure our safety since the start of the Pandemic. Management is clearly more interested in grinding profits out of us for the shareholders than investing in our safety.

Management's greed in this moment WILL NOT STAND.

Union Pacific must immediately provide full quarantine pay and common sense Covid-19 safeguards on the job, or we will do everything we can under the law to make our jobs safe. Federal law protects our right to withdraw from service if dangerous workplace conditions present an "imminent danger of death or serious injury".

U.P. has until the end of the day on December 27th to respond to our safety demands. Get ready.

An Injury to One is an Injury to All!
